

GENERAL CONSTRUCTION

FRAMES

All frames are constructed using a combination 4/4/kiln-dried hardwoods with 7/8 hardwood laminated ply-board.

STRETCHER RAILS

All stretcher rails are doweled, glued and/or screwed.

JOINTS

Where necessary, joints are cornered, blocked and screwed. Lag bolts are used when required.

SEATS

Seats are constructed of 8 gauge no sag sinuous wire, and attached with wire clips.

SUSPENSIONS

All tight back products have suspensions made of 11-gauge no sag sinuous wire attached with wire clips.

FOAM

All foam meets California Bulletin 117E and all seat foam is a minimum density of 1.8. Other fire requirements are available including TB133.
